Nutramax Laboratories Consumer Care, Inc. Announces NSF Certified for Sport[®] for Tivose[®] Immune Health Supplement*

Edgewood, MD – February 4, 2015 – Nutramax Laboratories Consumer Care, Inc. announced today that Tivose[®] Immune Health Supplement* received the NSF Certified for Sport[®] designation by NSF International, a highly regarded certification organization for public safety.

The NSF Certified for Sport[®] designation ensures that the product has been screened for more than 200 banned substances, and the designation is recognized by professional baseball, football, hockey, and golf organizations.

Tivose is an immune health product that contains a mushroom extract and is designed to help boost overall immune system support.*

Tivose delivers glucans capable of boosting the immune system by increasing macrophage and natural killer cell activity.* Studies have shown that Tivose raises macrophage activity by 27% and natural killer cell activity by 49%.▲

“Tivose is an important product for a consumer’s overall immune health; it is also convenient and economical in just one capsule per day. The Certified for Sport[®] designation by NSF International reinforces our commitment to provide safe, high quality products to our consumers,” says Troy Henderson, President and CEO of Nutramax Laboratories Consumer Care, Inc.

Tivose is available in a sixty (60) count bottle of capsules and is vegetarian and gluten free.

Tivose joins two other Nutramax Laboratories’ products (Cosamin[®] DS and Cosamin[®] ASU) with the NSF Certified for Sport[®] designation. To learn more about Tivose, please visit www.tivose.com.

About Nutramax Laboratories Consumer Care, Inc.:

Nutramax Laboratories Consumer Care, Inc., located in Edgewood, Maryland, focuses on researching and developing products to promote consumer health. About NSF International:

NSF International, the public health and safety company, is committed to protecting and improving human health around the globe through the provision of assurance and certification services, training, testing and consulting to the water and food industries. NSF services provide consumers with the confidence that what they eat and drink meets or exceeds globally accepted standards of health, safety and provenance. To learn more, visit www.nsf.org.

About NSF International's Certified for Sport[®] Designation:

The program's objective is to certify that participating sports supplement manufacturers have met NSF's stringent independent certification process guidelines, which were developed through a consensus process involving regulatory, sports industry and consumer groups. A key component of this program is an NSF mark on each product label, to show athletes, coaches and consumers that a sports supplement has met NSF's comprehensive Certified for Sport[®] program guidelines. To learn more, visit <http://www.nsf-sport.com/>.
